TABLE OF CONTENTS

CHAPTER I

CONSTITUTION OF STATE FORESTS

		Page
1.	Alteration in Area	1
2.	Forest Settlements	2
3.	Demarcation	2
4.	Forest Surveys	2

CHAPTER II

MANAGEMENT OF STATE FORESTS

1.	Regulation of Management— Preparation and Control of regular working plans; and Preliminary working plan reports	3
2.	Communications and Buildings—	
	(*a*) Roads and Bridges	4
	(*b*) Buildings	6
	(*c*) Miscellaneous works	6
3.	Protection of Forests—	
	(*a*) General Protection	6
	(*b*) Protection from Fire	7
	(*c*) Protection from Cattle	8
	(*d*) Protection against injuries from natural causes	10

CHAPTER III

SYLVICULTURE

1.	Formation and Regeneration of Forests—	
	(*i*) General progress of areas under regeneration	11
	(*ii*) Establishment of reproduction under working plans or schemes ..	12
	(*a*) Mainly natural	12
	(*b*) Mainly artificial	12
	(*iii*) Plantations and other forms of regeneration not under working plans or schemes	13
	(*iv*) Tending	14
	(*v*) General	14
2.	Tending of the growing stock	14

CHAPTER IV

EXPLOITATION

(*a*)	Systems of Management—	
	(*i*) Major Forest Produce	14
	(*ii*) Minor Forest Produce	15
(*b*)	Agency of exploitation—	
	(*i*) Departmental Agency	16
	Timber Depôts	17
	Firewood Depôts	17
	Mechanical extraction of timber	17
	Mechanical Transport	18
	Saw mills	20
	Cart Depôts	27
	Messrs. Howard Brothers' Timber Agency	27
	(*ii*) Purchasers	28
	(*iii*) Rights, Privileges and Free Grants	30
(*c*)	Outturn and sources of Forest Produce	31

List of trees and shrubs mentioned in the Report and their Latin names

Vernacular name	*Scientific Name*
Anjan	*Hardwickia binata.*
Babul	*Acacia arabica.*
Bahan	*Populus euphratica.*
Ber	*Ziziphus jujuba.*
Blackwood	*Dalbergia latifolia.*
Dividivi	*Cæsalpinia coriaria.*
Hirda	*Terminalia Chebula.*
Honne	*Pterocarpus Marsupium.*
Jamba	*Xylia xylocarpa.*
Kandi	*Prosopis spicigera.*
Lantana	*Lantana Camara.*
Matti	*Terminalia tomentosa.*
Mhowra	*Bassia latifolia*
Padouk	*Pterocarpus macrocarpus.*
Prickly pear	*Opuntia dillenii.*
Salai	*Boswellia serrata.*
Sandal	*Santalum album.*
Shigekai	*Acacia concinna*
Simul	*Bombax malabaricum.*
Tali	*Dalbergia Sissoo.*
Teak	*Tectona grandis.*

INTRODUCTION

The question of dispensing with a large number of the Forms printed as Appendices to the Administration Report has been raised, and an attempt has been made this year to incorporate as much information as possible in the body of the Report to allow of a number of the appendices being dispensed with if thought desirable. This has resulted in the production of a bulkier report than usual.

Although these appendices may not be of interest to the general public or to Government officials outside the Forest Department they are undoubtedly of the greatest interest and use to Forest Officers. It is most convenient to them to have the information for each Forest Division in an easily accessible form, and the method up to now in force, with slight modifications dictated by experience from time to time, could hardly be improved on. The printed Administration Report with appendices was most useful to the members of the Forest Grievance Committee, and saved an enormous amount of correspondence and investigation of old records.

FOREST ADMINISTRATION REPORT OF THE BOMBAY PRESIDENCY INCLUDING SIND FOR THE YEAR 1925-26

CHAPTER I

CONSTITUTION OF STATE FORESTS

1. *Alteration in Area (Forms 51 to 51D)*

The changes in forest area were as follows :—

Class of forest	Area on 1st April 1925	Added during the year	Excluded during the year	Area on 31st March 1926
	Sq. Miles	Sq. Miles	Sq. Miles	Sq. Miles
Reserved	13,815	42	84	13,773
Protected	1,203	45	19	1,229
Total ..	15,018	87	103	15,002

The areas added and excluded comprise :—

	Square Miles	
	Gain	Loss
Afforestments and disforestments	15	13
Alluvial accretions and erosions in Sind ..	26	55
New *kachas* in Sind first included in Reserved Forest and subsequently declared Protected Forest.	35	35
Corrections in areas in Forest Registers ..	11	..
Total ..	87	103

Net loss .. 16 Square Miles.

The forest area in charge of the Forest and Revenue Departments stood as follows :—

	On 1st April 1925			On 31st March 1926		
	Reserved Sq. Miles	Protected Sq. Miles	Total Sq. Miles	Reserved Sq. Miles	Protected Sq. Miles	Total Sq. Miles
In charge of the Forest Department.	11,756	547	12,303	11,718	574	12,292
In charge of the Revenue Department.	2,059	656	2,715	2,055	655	2,710
Total ..	13,815	1,203	15,018	13,773	1,229	15,002

The forest area in the various Circles at the end of the year was :—

Northern	Circle	..	3,832	square miles.
Central	do.	..	5,385	do.
Southern	do.	..	4,626	do.
Sind	do.	..	1,159	do.

A redistribution of area took place at the close of the year between the Southern and Eastern Divisions of Kanara and the Dharwar-Bijapur Division.

2. *Forest Settlements* (*Form 52*)

The settlement of areas aggregating 104 square miles, chiefly in the Northern Circle, was in hand at the beginning of the year and additional areas aggregating 49 square miles, chiefly in Sind, were taken in hand during the year. The settlement of 49 square miles, chiefly in Sind, was completed, and 104 square miles are still in hand. No expenditure was incurred on settlement during the year.

Mr. Perry's report on the resettlement of the gurcharans in Thana District was still under the consideration of Government at the close of the year. The field work for the selection of rabi lands (Protected Forest) of Peint for inclusion in Reserved Forest was completed but the report is still pending. Two hundred and ninety acres of forest were given out as "Soppinbetta" to gardeners in the Kanara Coast Division.

3. *Demarcation*

Sixty-two miles of boundary line were newly demarcated during the year, chiefly in the Southern Circle and Sind, and 101 miles, chiefly in the Southern Circle, still remains to be demarcated. The work of demarcation will never be quite completed, owing to alterations in area from year to year due to accretion, erosion, disforestments and afforestments. The total length of boundary line is estimated at 40,693 miles. Rs. 547 was spent on new work and Rs. 3,041 on repairs to old boundary marks.

4. *Forest Surveys*

No. 8 Party, Survey of India, surveyed 48 square miles of forest in West Nasik, Poona and Kolaba Divisions, at a cost of Rs. 7,946 during the year. Eighty-one square miles of forest in Sind were surveyed without any cost to the Forest Department. Two hundred and seventy-six square miles in Dharwar-Bijapur and 1,078 square miles in Sind still remain to be surveyed out of the total forest area of 15,002 square miles.

The expenditure on constitution of State forests was as follows :—

		1924-25	1925-26
		Rs.	Rs.
Northern	Circle	7,813	8,355
Central	do.	1,054	1,315
Southern	do.	8,655	1,084
Sind	do.	..	12
	Total ..	17,522	10,766

CHAPTER II

MANAGEMENT OF STATE FORESTS

1. *Regulation of Management*

(*a*) *Preparation and control of Regular Working Plans. Preparation* (*Form No. 55*).—Except in Sind, where the preparation of working plans is up-to-date, there was great activity in the preparation and revision of working plans throughout the Presidency.

The following working plans received the sanction of Government :—

(*i*) A new working plan for the whole of the Bijapur Scrub forests.

(*ii*) A revised working plan for Gund forests (Kanara W. D.)

The following working plan was submitted to Government for sanction :—

A new working plan for the Dharwar-Kod Scrub forests.

The following working plans received the approval of the Chief Conservator and will now be submitted to Government for sanction :—

(*i*) A revised working plan for the whole of the Panch Mahals forests.

(*ii*) A revised working plan for the whole of the Kolaba forests.

(*iii*) A new working plan for the Nawapur-Nandurbar forests in West Khandesh.

(*iv*) A revised working plan for the Nagargali forests in Belgaum Division.

Progress was made with the following working plans, which received the approval of the Chief Conservator after the close of the year and will be forwarded to Government in due course :—

(*i*) A working plan (partly revision, partly new) for the whole of the Dangs forests, including also the Western Baragaon Dangs.

(*ii*) A revised working plan for the Bulsar-Chikhli forest in Surat Division.

(*iii*) A revised working plan of Series I to VII of the teak High Forests in Kanara N. D.

Work was also in progress on the following working plans, which have not yet reached the Chief Conservator :—

(*i*) A revised working plan for the Ankola-Ramanguli High Forests in Kanara S. D.

(*ii*) A revised working plan for the Khanapur Fuel Area in Belgaum Division.

Preliminary working plan reports were submitted to the Chief Conservator for the following areas :—

(*i*) The Dangs, including Baragaon Dangs (approved).

(*ii*) Mandvi forests in Surat Division (revision decided to be unnecessary).

(*iii*) Bulsar-Chikhli forests in Surat Division (approved).

(*iv*) Scrub forests in East Khandesh (not approved, now being revised).

There was a net addition of 107 square miles to the area under working plans during the year, which now amounts to 7,917 square miles out of a total of 9,616 square miles for which working plans are considered necessary ; and new plans are now under preparation for 657 square miles out of the 1,699 square miles for which plans are required, in addition to which old plans are under revision for an area of 1,914 square miles. On the whole it may be said that good progress is really being made with the preparation and revision of working plans. The control of this work entails an enormous amount of supervision on the part of the Chief Conservator and the Conservators, and it is remarkable that so much work has been put through in the course of the year. The time is long overdue for the formation of the preparation, revision, and contol of working plans into a separate charge—a matter that has been urged for many years past, and to such good effect that the appointment of a Working Plans Conservator was sanctioned in the year 1921-22, but effect has never been given to the sanction.

Control of working plans (*Form No. 55A*).—The prescriptions of the various working plans were carried out as far as possible ; but scarcity of labour and lack of funds were responsible for arrears in working in several cases. Once a working plan has been sanctioned by Government the provision of funds for carrying out its prescriptions should follow automatically. *This is by no means the case at present*, and it is a most regrettable fact that exploitation is being hampered for want of funds to make and repair roads, whilst plantation works have at the same time to be seriously curtailed for want of money. The Department is doing its very utmost to realize the full revenue from the forests and at the same time to improve the property, but without the proper provision of funds it is impossible to fulfil this double purpose. Whatever may be the state of the general finances of the Presidency those of the Forest Department are thoroughly sound and improving year by year, and it would seem a sound policy to put more money into a paying concern.

2. *Communications and Buildings* (*Form No. 56*)

(*a*) *Roads and Bridges.*—Construction work was in progress on 86 miles of new roads and repairs were carried out on 880 miles of old roads. The total expenditure under this head was Rs. 2,42,004 of which Rs. 1,16,858 was for new works and Rs. 1,25,146 for repairs as against a total of Rs. 1,90,542 (Rs. 1,14,974 for new works and Rs. 75,568 for repairs) in the previous year. A new item of expenditure in the year under review is the maintenance of the Alnawar-Dandeli Railway, now for the first time charged in the accounts of the Southern Circle and amounting to Rs. 55,267 which is included in the amount mentioned above as charged to repairs. As the same item includes an amount of Rs. 25,600 paid as a subsidy to the District Local Boards of Kanara (Rs. 24,500) and Nasik (Rs. 1,100) it will be seen that a sum of only Rs. 45,136 is left for repairs to 1,292 miles of

forest roads in the Presidency. This sum is totally inadequate for the purpose and the roads are fast deteriorating under the heavy timber traffic to which they are subjected. The attention of Government has already been called to this and a supplementary grant of Rs. 30,000 asked for during the current year and refused. If funds are not provided for repairs the roads will be ruined, exploitation costs will rise, and less timber be extracted. This is a very urgent matter, and it cannot be too plainly stated that we are asking for trouble if we neglect to maintain our roads up to the proper standard.

More export roads are urgently needed to tap the valuable teak forests of the Dangs and Peint, where much good timber is locked up and going to waste for want of export facilities. The gross revenue of Surat Division has risen from one to six lakhs in 15 years, and this increase is due mainly to road construction. With an example like this before us there should be no hesitation in launching out into a further programme of road construction to tap the forests which are so far unworked. The timber is there, and there is a good market waiting for it and able to consume the whole of the output. The sooner these forests are rendered accessible for exploitation the better, as the mature timber in them is now decaying.

The intervening Baroda Section on the Waghai-Nawapur road, one of the main outlet roads of the Dangs, remained unconstructed by the Baroda Durbar, to the great detriment of the exploitation of the Dangs Forests; and no progress was made by the Portuguese authorities with the construction of their section of the road from the Peint Forests to the Thana coast. On the other hand the Gaikwar's Baroda State Railway extension to Jharya in the Dangs was opened to all traffic, and an extension to Waghai, a more suitable terminus, is under contemplation.

Officers in charge of works are hampered by the inelasticity of the finance rules, which make it difficult to spend the allotted money within the financial year and sometimes necessitate the disbanding of labour at the end of March because funds have not by then been sanctioned for carrying on the work in the next year. Anyone who has had to carry out work in a forest district knows that if work is interrupted at the end of March it is not likely to be resumed till several months have passed. It seems desirable that once the construction of a road has been sanctioned it should be permissible to proceed with the work without interruption until it has been completed.

Shortage of wagons was not uncommon on the Alnawar-Dandeli Forest Railway. This affects the price of timber at the Dandeli Depôt and contributed to a net loss on the working of the line during the year of Rs. 9,514 as against Rs. 13,542 in the previous year. This has been brought to the notice of the Railway authorities.

The Tata Power Company gave permission to coupe contractors in Kolaba District to make use of their Roha-Bhira light railway free of charge for the transport of the coupe material, and one contractor took advantage of this concession.

(*b*) *Buildings.*—The total expenditure on buildings was Rs. 97,016 (Rs. 59,961 on new works and Rs. 37,055 on repairs) as against Rs. 1,29,508 (Rs. 95,818 on new works and Rs. 33,690 on repairs) in the previous year. The expenditure on new works was for the most part incurred on quarters for subordinates. Three rest-houses were under construction during the year. Several timber sheds and cattle pounds were completed.

Lesney Lodge, a bungalow in Nasik, was acquired as a residence for the Divisional Forest Officer, East Thana, by the Public Works Department. No suitable provision has yet been made for headquarter residences for the forest officers at Belgaum and Dharwar.

(*c*) *Miscellaneous.*—Rs. 8,406 were spent on new works and Rs. 13,414 on repairs, as against Rs. 3,501 and Rs. 17,771 in the previous year. Expenditure under this head is incurred chiefly on wells, fencing of compounds, telephone rent, electric installation, and (a new item) the improvement of watering facilities for men and cattle in the Satpuda Hills.

3. *Protection of Forests* (*Form No. 57*)

(*a*) *General protection.*—The following statement compares the number of forest offences of the year with those of 1924-25 and the average of the last three years :—

Class of offence	1925-1926					1924-25	Average of 1922-23 to 1924-25
	Northern Circle	Central Circle	Southern Circle	Sind	Total		
I. Injury to forests by fire.	689	546	609	115	1,959	1,717	1,680
II. Unauthorised felling or removal of produce.	2,231	3,254	1,391	1,267	8,143	7,964	7,543
III. Unauthorised grazing.	2,030	2,122	827	1,516	6,495	5,936	6,184
IV. Other offences.	294	1,054	236	113	1,697	1,300	1,298
Total for 1925-26.	5,244	6,976	3,063	3,011	18,294	..	....
1924-1925 ..	5,005	6,108	3,244	2,560	..	16,917	....
Average of 1922-23 to 1924-25.	4,991	5,995	2,938	2,781	..	..	16,705

There was an increase in each Circle except in the Southern Circle, and under each class of offence. The increase in the number of offences is attributed to increased vigilance on the part of the staff, and in the case of fire offences to an exceptionally unfavourable season.

The Conservator of Forests, Northern Circle, remarks that the number of offences reported are no indication whatever of the constant pilfering that goes on, and that in Thana very serious damage is being done to young teak poles and saplings. On the other hand protection in Peint, the Dangs and Mandvi is wonderfully good.

In the Southern Circle the liberal provisions of the revised settlements and the better understanding of the villagers are leading to a decrease in the number of cutting and grazing offences.

The Sandalwood cases in Belgaum District referred to in the last year's report and some additional similar cases in Dharwar District have resulted in the conviction and punishmnent of the accused and the confiscation of the property to Government, and it is hoped that these successful prosecutions will go a long way towards stopping such thefts. One Forester and two Guards were dismissed and the promotion of two Rangers stopped in connection with these cases.

Three hundred and eighty-four new cases were taken into Court during the year. Three hundred and ninety cases including 160 pending from the previous year were decided and of these 352 or 90 per cent. resulted in convictions. 15,015 cases were compounded, and compensation amounting to Rs. 1,39,578 was recovered in 14,612 cases, the average per case being Rs. 9·6, as compared with Rs. 9 in the previous year. Offenders in 403 cases were let off with a warning, and in 2,779 or 14·2 per cent. of the total of new and pending cases the offenders were not detected.

In Belgaum District a Guard was murdered whilst attempting to impound cattle, but the accused in the case were acquitted.

In Sind one case of murder, two of assault, and one of making false allegations against forest subordinates resulted in convictions.

(*b*) *Protection from Fire* (*Forms Nos. 58 and 59*).—The following table compares the results of the past two years :—

Circle	Year	Area attempted to to be protected	Failure	Area actually protected
		Sq. Miles	Sq. Miles	Sq. Miles
Northern	1925-26 ..	3,345	·114	3,231
	1924-25 ..	3,345	120	3,225
Central	1925-26 ..	2,749	116	2,633
	1924-25 ..	2,702	94	2,608
Southern	1925-26 ..	2,037	124	1,913
	1924-25 ..	4,252	126	4,126
Sind	1925-26 ..	493	3	490
	1924-25 ..	473	3	470
Total ..	1925-26 ..	8,624	357	8,287
	1924-25 ..	10,772	343	10,429

Circle	Year	Percentage of area actually protected	Cost	Cost per Square mile protected
			Rs.	Rs.
Northern	1925-26 ..	96·6	14,125	4·2
	1924-25 ..	96·4	13,614	4·2
Central	1925-26 ..	95·7	8,691	3·2
	1924-25 ..	96·5	11,239	4·3
Southern	1925-26 ..	93·9	7,018	3·4
	1924-25 ..	97·0	6,379	1·5
Sind	1925-26 ..	99·4	733	1·5
	1924-25 ..	99·4	760	1·6
Total ..	1925-26 ..	95·9	30,567	3·5
	1924-25 ..	96·8	31,992	3·1

On the whole this was a bad year for fire protection, owing to the early cessation of the rains and the absence of hot weather thunderstorms, and in some places to the presence of large quantities of dead bamboo clumps. Undoubtedly many of the fires were intentionally started and we have yet a long way to go before we can depend on the cordial help of the people in fire protection. The system of communal punishments for bad protection and rewards for good protection is undoubtedly of great help in securing their support, but the fact remains that the act of one ill-disposed individual is enough to undo the work of the rest of the community.

In areas where protection of the forests throughout the hot weather is considered impossible or improbable early burning in the cold-season has been resorted to, but although this results in a mitigation of the damage done it is by no means an ideal remedy. The aim of the Department must be to protect at least their young plantations and exploitation areas from fire, and as much of the rest of the forests as possible.

The following table compares the number and origin of fires for the past two years :—

Origin of fire	No. of fires		Area burnt in acres	
	1925-26	1924-25	1925-26	1924-25
A. Originating in Departmental Fire Conservancy operations.	73	54	5,852	7,373
B. Crossing exterior fire traces.	196	142	29,087	21,175
C. Accidents (Persons in Forest.)	553	557	70,824	52,297
D. Intentional (Do.) ..	161	103	13,551	13,695
E. Railway Engines ..	23	25	1,893	4,858
F. Lightning	....	....	....	....
G. Causes unknown ..	951	856	159,035	125,420
Total ..	1,957	1,737	280,242	283,317

(c) *Protection from cattle* (*Forms Nos. 60 and 61*).—The forest areas open and closed to grazing were as follows :—

	Sq. Miles	Per cent.
Closed to all animals for the whole year ..	2,179	14·52
Closed to all animals for part of the year ..	301	2·01
Open to all animals except browsers for the whole year	9,065	60·43
Open to all animals except browsers for part of the year	..	..
Open to all animals for whole of the year ..	3,457	23·04
Open to all animals for part of the year ..	..	..
Total ..	15,002	

Complaints were received that sheep and goats spoil the grazing for cattle and requests are made that separate areas should be assigned for the different categories of animals. In such cases it would be necessary to give preference to the claims of agricultural cattle.

The area open to grazing is nearly everywhere sufficient, and closure is relaxed in cases of hardship. Extensive experiments are being carried out in the Central Circle with a system of partial closure, under which greater facilities will be available to the people. Extensive closed areas were thrown open to grazing in the hot weather owing to the late arrival of the rains.

The numbers of cattle admitted to grazing were as under :—

Circle	Horned Cattle		Sheep and Goats		Camels
	1925-26	1924-25	1925-26	1924-25	1925-26
Northern	618,686	634,876	133,518	134,245	....
Central	794,060	820,203	271,526	286,666	....
Southern	388,914	417,012	82,821	67,696	....
Sind	43,690	46,601	49,506	60,759	1,972
Total ..	1,845,350	1,918,692	537,371	549,366	1,972

Circle	Camels —*contd.*	Other animals		Total	
	1924-25	1925-26	1924-25	1925-26	1924-25
Northern	....	1,177	1,482	753,381	770,603
Central	....	9,839	11,264	1,075,425	1,118,133
Southern	....	226	958	471,961	485,666
Sind	1,528	2,361	2,474	97,529	111,362
Total ..	1,528	13,603	16,178	2,398,296	2,485,764

The decrease in the Central Circle was due to the shortage of fodder in Khandesh, which necessitated the cutting of much grass in the Satpudas, and this kept outside cattle from coming to graze in such large numbers as usual. In the Southern Circle there was great mortality of cattle caused by disease. In Sind the floods were lower than usual whilst conditions in the hills and in Cutch were unusually favourable, and animals from these tracts did not come in in such large numbers as usual.

The grazing fees collected during the year were Rs. 5,11,056 as compared with Rs. 5,64,175 last year, the value at full rates being Rs. 21,04,068 and Rs. 21,75,018 for the two years respectively.

The number of cattle impounded for unauthorised grazing in open and closed forest is given below :—

Circle	Horned Cattle		Sheep and Goats		Other animals
	Open	Closed	Open	Closed	Open
Northern	2,995	25,593	9,975	5,173	22
Central	3,135	34,063	26,565	4,169	41
Southern	111	6,248	4,039	3,419	....
Sind	1,532	1,495	559	4,320	132
Total 1925-26 ..	7,773	67,399	41,338	17,081	195
Average of three years from 1922-23 to 1924-25.	5,013	67,564	22,984	23,701	243

Circle	Other animals—*contd.*	Total		Total of open and closed forests	
	Closed	Open	Closed	1925-26	1924-25
Northern	77	12,992	30,843	43,835	36,014
Central	247	29,741	38,479	68,220	59,360
Southern	11	4,150	9,678	13,828	17,723
Sind	1,591	2,423	7,406	9,829	11,515
Total 1925-26 ..	1,926	49,306	86,406	135,712	124,612
Average of three years from 1922-23 to 1924-25.	1,655	28,240	92,920	121,160	121,343

The increase in impoundings in the Northern and Central Circles is attributed to increased vigilance on the part of the staff. In the Southern Circle more closed areas were thrown open to grazing and impoundings were consequently fewer. In Sind in many cases graziers preferred to compound the offence and pay the compensation rather than have their animals impounded.

(*d*) *Protection against injuries from natural causes. Vegetable pests.*— Creepers, lantana, prickly pear, loranthus and wild cosmos are common, and a certain amount of eradication is carried out by the forest staff, but owing to lack of funds it is impossible to organise a regular compaign against them. Lantana is useful as a nurse for young sandal and other plants, but in other ways is a terrible pest.

Animal pests.—Bison, sambhur, monkeys, porcupines, hares and rats do damage to the young plantations by rubbing, trampling, nibbling and uprooting. It is said that hares, which do most of their damage on moonlight nights, can be scared off by putting cairns of whitewashed stones in the plantations. Stones placed round individual seedlings seem to afford some protection against rats, but this is not always the case. Tarring of "Tali" stems proved efficacious against porcupines in Sind.

Insect pests.—The larvae of Phassus malabaricum did damage by boring in teak seedlings in the plantations of the Southern Circle. Grasshoppers destroyed small teak seedlings on a considerable scale. Teak defoliators were at work in Taloda (North Khandesh) and Nagargali (Belgaum), but as they started late in the season they did not do such heavy damage as usual.

Other causes of injury.—Frost did harm to the young babul plantations in Upper Sind but was less severe than usual in Lower Sind. Young teak plants suffered from frost in Panch Mahals.

Erosions.—In Sind 26·3 square miles were eroded, including 1·1 square miles growing valuable timber, 1 square mile of coupes under regeneration and 3·2 square miles of new alluvium with young trees. 1,124 acres exploited before erosion realised Rs. 22,311, and 3,137 acres, exploited in anticipation of erosion realised Rs. 41,307. 75 acres were eroded before exploitation was possible, containing growth valued at Rs. 1,510.

CHAPTER III

SYLVICULTURE

1. *Formation and Regeneration of Forests*

(i) General Progress of Areas under Regeneration

Throughout the Presidency proper the common methods of regeneration are (*i*) Coppice, (*ii*) tending of natural seedlings, (*iii*) sowing and planting. On the whole coppice gives good results in the smaller class forests and teak shoots may reach a height of ten feet or more in their first year. Most species in this class of forest coppice well and it has been observed that Anjan coppices best when the tree is cut at a height of a foot or more above ground level; in most other cases it seems best to cut the tree at ground level. Natural seedlings come up in great numbers in the open type of forests as a result of fire protection, and it is especially noticeable that in the last 25 years fine crops of teak poles have established themselves in the forests of Surat and West Khandesh Divisions as a result of fire protection. In the heavier high forests of the Southern Circle it has been found necessary to resort to artificial regeneration following on clear-cutting, and it has in fact been found desirable in almost every type of forest throughout the Presidency to supplement natural by artificial regeneration. Experiments have been made in various methods of sowing and planting of teak, and the most favoured method is now the sowing of specially prepared teak seed on

burnt patches, which has proved successful in all regions except those of very precarious rainfall, which are hardly suited for the growth of teak at all.

The system of regular plantations of teak has now been in force for a period of nearly ten years, and whilst some of the earlier plantations have not done as well as might have been expected the later efforts are much more uniformly successful and it is safe to say that the problem of teak regeneration has been solved. New problems are arising as the young crop grows up, chief of which are at present the questions of thinnings and of the introduction of a suitable mixture of other species amongst the teak. Both these questions are receiving attention. There are many difficulties to contend with, such as weeds, fires, wild animals, insect pests and so forth, but in spite of all these the plantations are making really good progress and reflect very considerable credit on the staff responsible for carrying them out.

In Sind regeneration by sowing depends primarily on inundations from the Indus, which fluctuate in extent from year to year. Great skill and local knowledge are necessary to deal with the areas so as to get the best results, and the success which has attended the operations in recent years is extremely gratifying.

(ii) Establishment of Reproduction under Working Plans or Schemes

(*a*) *Mainly Natural*

Regeneration by coppice was good nearly everywhere. Natural reproduction of teak from seed was good in the Dangs, in the Deomogra Reserve of West Khandesh, and other similar localities which enjoyed good fire protection. But in areas of denser growth, or areas which suffered badly from fires, or areas with a precarious rainfall, teak regeneration is much more sparse. In Sind natural reproduction from Babul and Kandi seed and from coppice was on the whole satisfactory.

(*b*) *Mainly Artificial*

Northern Circle.—The sowing and planting of teak on burnt patches was carried out in all the newly-felled coupes in the Thana Division with good results, and it is calculated that on an average 175 seedlings have been established per acre, about twice as many as were obtained 4 or 5 years ago. In Panch Mahals it is found that mere burning of branchwood tends to cake the soil very hard, and the patches have to be ploughed the year before burning. Here the results are fair, but the rainfall is too precarious to allow of teak plantations being easily successful. Fortunately coppice is plentiful and good. In Mandvi, Bulsar—Chikhli, and East Nasik sowing of teak was done with a certain measure of success.

Central Circle.—The best results here were in Kolaba Division, where the problem of teak regeneration has been successfully solved, and the propagation of bamboos has made some progress. The work in Kolaba

Division is highly creditable to the Divisional Forest Officer and his staff. In West Khandesh progress was made with teak regeneration, and there is no reason why this should not ultimately be as successful here as in Kolaba. Agri-cum-forestry plantations in this Division were a failure owing to shortage of rain. In North Khandesh, East Khandesh, Poona and Satara Divisions the results of plantations were rather disappointing owing to the failure of rain, but the placing of stones around the seedlings has proved beneficial, as they conserve the moisture in the soil, and it is expected that with more experience plantations in these Divisions will give better results.

Southern Circle.—In this Circle intensive planting and sowing of teak in felled areas is now being done on a large scale in every Division, and the work is well understood by the subordinates. The monsoon of 1925 was unfavourable, as it started with heavy rain in May, which was succeeded by a long dry spell in June during which many of the tender seedlings died of drought. Replacement of failures by nursery plants was however done with a considerable measure of success and on the whole the results were good. An interesting experiment in Kanara, S. D., was the sowing of tobacco on 20 acres as a catch-crop with teak. This proved quite successful. Elsewhere chillies have been successfully grown for the same purpose. Sandalwood is now being sown in areas suitable for its growth, with good results.

Sind Circle.—In 20,316 acres of exploited coupes, kachas and blanks, babul, kandi and ber were sown with excellent results. 2,959 acres were successfully regenerated on the agri-cum-forestry system, which costs Government nothing, and actually brings in revenue from the people who crop the land. Rs. 60,554 were recovered as assessment for 12,766 acres under cultivation preparatory to regeneration.

Throughout the Presidency Rs. 40,478 were spent on plantations in working plan areas and regeneration was fully completed in 25,832 acres.

(iii) Plantations and other Forms of Regeneration not under Working Plans or Schemes

Northern Circle.—In the Dangs and West Nasik extensive teak plantations were made on areas clear-felled in anticipation of the new working plans, and an area of nearly a thousand acres was successfully regenerated.

Central Circle.—In Poona Division 185 acres were regenerated under the agri-cum-forestry method.

Southern Circle.—Advantage was taken of the extensive fires in Kanara, E. D., to sow up patches where dead bamboo clumps had burnt, and good crops of teak seedlings were raised in many places. In Kanara, S. D., 220 acres of inferior forest was cut and successfully regenerated with teak. Sandalwood seed was sown with good results in Belgaum, Kanara, S. D. and Dharwar-Bijapur.

Sind Circle.—The Tali (*Dalbergia sissoo*) plantations in Upper Sind were continued and an area of 24 acres added to them.

Throughout the Presidency Rs. 17,505 were spent on plantations outside the working plan areas and 9,108 acres were completely regenerated.

(iv) Tending

When teak plantations were first started on a large scale there was a tendency to neglect the planted area at the end of the first year and devote all the attention of the staff to the coming year's plantations. This is now no longer the case, and weeding and cleaning operations are carried out wherever necessary. It seems to be the general rule that weeding is necessary for at least two years and a cleaning about the fifth year.

In Sind extensive cleaning work was done in the young babul areas, and the good effect of this work on the young growth is extraordinary.

(v) General

In spite of an unfavourable monsoon the results of the year's plantation work were on the whole very good indeed. The entire forest staff of all ranks are now keen on this work and there is a spirit of friendly rivalry abroad which helps things along in a wonderful way.

2. *Tending of the Growing Stock*

Improvement fellings were carried out in the Dangs, West Khandesh, Kolaba and in the Kanara and Belgaum Divisions. In Thana a fully organised system of thinnings in old coupes is now in force, and a similar system is being introduced in the Southern Circle. Creeper cutting was carried out in all Divisions. In Sind thinnings were carried out over an area of 6,268 acres, yielding a net revenue of no less than Rs. 76,822. There is no doubt whatever that as a result of the many works of improvement now going on the forests of the next generation will be immensely more valuable than those of the past. Money wisely spent on the improvement of the forests now will give a very handsome return in the future.

CHAPTER IV

EXPLOITATION

(a) Systems of Management

(*i*) *Major Forest Produce* (*Form No. 63*)

Form No. 55-B in appendix shows the areas in which the various systems are in force.

Clear fellings—Were carried out in the three Thana Divisions ; Panch Mahals, Kolaba, Nawapur-Nandurbar Forests and Teak Pole areas of the Southern Circle generally as also in areas selected for regeneration in the High Forests of the Dangs, Peint and Kanara, Babul Forests, Casuarina plantations and throughout Sind Forests.

Coppice with standards.—In the forests of Bulsar-Chikhli, Mandvi, Igatpuri, above-ghat parts of Nasik, Satpuda forests in East and North Khandesh Divisions, in Edlabad "Anjan and Scrub" area, in Working Circle III of the Satmala Plan, in the Teak forests of Poona and Satara and in certain evergreen forests of Poona Division.

Improvement fellings—Were carried out in Dang Reserves and West Baragaon Dangs, in four coupes in North Khandesh Division, in scrub jungles of East and West Khandesh, in Matheran Plateau and Terrace forests and in Mahableshwar forests; and in some of the High Forests of Kanara.

Selection fellings—In Dangs Protected Forests and in certain High Forest areas of Kanara and Belgaum.

Simple Coppice fellings—Were carried out under regular and provisional plans in fuel coupes in Kanara, Belgaum and Dharwar-Bijapur Divisions.

Unregulated fellings—Include clearings for cultivation in Dang Protected Forests and in Taloda Range, removal of Teak standing on plots in new settlements in North and East Khandesh; clearing of 297 acres in Panch Mahals for extension of Simul plantation; concession fellings of matchwood species in Panch Mahals, Dangs, Tansa Catchment Area, Kolaba Division, and in the unorganised evergreen forests in Patan Range (Satara Division); removal of dead and wind fallen trees; exploitation of dead, dying and mature sandalwood trees in the Central Circle and Southern Circle; clearing of grazing grounds in Kanara, E. D.; exploitation of erosion strips in Sind; felling of royalty trees in Malki lands and of reserved trees from Revenue waste lands in parts of Central Circle and Southern Circle and small fellings for free grants, permits, etc.

(*ii*) *Minor Forest Produce* (*Form No. 64*)

As usual, minor produce was mainly farmed out or sold on permits except for bamboos in Thana, Mandvi, Dangs and Peint, which are sold according to prescriptions of working plans.

2,573,830, 1,023,655 and 5,000,072 lbs. of grass were baled and stored at Godhra, Dohad and Palghar under the Famine Fodder Schemes financed from famine funds, bringing the amount stored at these three Depots up to 313 lakhs lbs. After the end of the year a strong demand for grass sprang up and most of the grass was sold. The famine grass stores in West Khandesh, amounting to 172 lakhs, were also sold off after the end of the year. These famine grass operations have served their purpose, and as storage of kadbi has now been undertaken in the Deccan and the storage of grass in Gujarat is now carried out to a great extent by private individuals, the storage of grass by Government agency should be stopped at the end of the present contracts.

Hirda was collected departmentally on the share system in the Poona Division; a contract for extraction of oil from cinnamon leaves was given during the year for the second time in S. D. Kanara; in Hyderabad Division, as good offers from contractors were not obtainable for the lac crop, part of it was gathered departmentally.

(b) Agency of Exploitation

(i) *Departmental Agency*

The following is a comparative statement of major and minor produce extracted departmentally during the two years 1925-26 and 1924-25 :—

Circle	Year	Major Forest Produce			
		Timber in thousands	Fuel in thousands	Total in thousands	Sandal-wood
		Cubic feet	Cubic feet	Cubic feet	Rs.
Northern	1925-26 ..	563	724	1,287	....
	1924-25 ..	585	471	1,056	....
Central	1925-26 ..	14	241	255	2,513
	1924-25 ..	5	258	263	1,716
Southern	1925-26 ..	1,086	195	1,281	82,794
	1924-25 ..	961	1,909	2,870	73,945
Sind	1925-26 ..	9	2,064	2,073	....
	1924-25 ..	16	2,400	2,416	....
Total ..	1925-26 ..	1,672	3,224	4,896	85,307
	1924-25 ..	1,567	5,038	6,605	75,661
Difference ..		+ 105	−1,814	−1,709	+ 9,646
Percentage of total out-turn from all sources.		28	7	10	100

Circle	Year	Minor Forest Produce			
		Bamboos	Grass	Other	Total
		Rs.	Rs.	Rs.	Rs.
Northern	1925-26 ..	....	9,322	362	9,684
	1924-25 ..	....	6,311	174	6,485
Central	1925-26 ..	....	....	5,051	5,051
	1924-25 ..	....	....	8,077	8,077
Southern	1925-26 ..	....	8	14,275	14,283
	1924-25 ..	....	....	9	9
Sind	1925-26 ..	....	....	5,374	5,374
	1924-25 ..	....	....	40	40
Total ..	1925-26 ..	....	9,330	25,062	34,392
	1924-25 ..	....	6,311	8,300	14,611
Difference		....	+ 3,019	+ 16,762	+ 19,781
Percentage of total out-turn from all sources.		....	6	8	2

In the Northern Circle the increase in fuel is due to arrears of thinnings in North and East Thana having been completed along with the current year's. Additional storage room permitted of a larger stock of famine fodder being collected, hence the increased royalty for grass.

In the Central Circle the increase in the outturn of timber is due to clearance of 61 settlement plots in the East Khandesh Division. The fall in the outturn of fuel is due to less departmental work done owing to surplus of fuel on hand. The increase in the revenue from sandalwood was due to increased exploitation of mature trees found in Malki lands in Satara Division. The drop in the revenue for minor produce departmentally collected is due to the sale to contractors of the right to collect mhowra seed in North and West Khandesh and to the low prices obtained for hirda in the Poona Division.

In the Southern Circle the increase under timber is due to greater activity on the part of logging contractors in Kanara, N. D. and W. D. The great decrease in fuel is due to the stoppage of the fuel supply to the M. & S. M. Railway. The increase under sandalwood is partly due to outstanding recoveries and partly to a larger quantity being exploited during the year. The value of the minor produce includes the price of hirda and divi-divi pods estimated at Rs. 14,235 remaining unsold at end of the year.

In Sind, the decrease in the outturn of major produce under "Timber" is due to slack outside demand. The fall in fuel is due to fewer thinnings having been worked departmentally. The increase in the value of minor produce is due to part of the lac crop in Hyderabad Division having been collected departmentally.

Timber Depots.—The prices obtained in the depots in Northern Circle and Southern Circle compare favourably with those obtained last year. Most of the old timber in stock in the Southern Circle Depots was disposed of for what it would fetch instead of allowing the same to deteriorate further in the Depots.

Firewood Depots.—The fuel depots in North and West Thana, and at Trimbak in West Nasik were run by contractors, while the Igatpuri depot was worked departmentally where the expenditure was Rs. 2,071-12-0, the receipts Rs. 4,025, and apparent profit Rs. 1,953; but apart from the help afforded to forest protection, the result is a loss on the sale of the coupes concerned. The depots at Matheran and Mahableshwar were worked departmentally and that at Panchgani through a contractor.

Of the 13 depots in Kanara only one was worked departmentally and 12 were worked by contractors.

Mechanical extraction of Timber.—Both the Fordson and Buffalo-winch outfits were employed on extraction in the upper portion of the Nagzari valley in compartment 23. The work of the season was very successful showing improvements in all directions. The quantities extracted by the two outfits during the year were 919 and 433 tons with

average lengths of haul of 720′ and 600′ as against 573 and 466 tons with average lengths of haul of 780′ and 407′ respectively last year. The costs of extraction including depreciation, interest and supervision charges and establishment and maintenance charges during the year, including the period the outfit was lying idle, worked out to Rs. 7-12-0 and Rs. 6-14-0 per ton during the year as against Rs. 9-11-0 and Rs. 6-8-0 per ton last year. The increase in the case of the Buffalo-winch is due to less quantity extracted owing to greater average length of haul. The Fordson outfit shows a reduction of 20 per cent. in cost of extraction. The above costs will very likely be capable of further reduction as more experience of working the outfits is gained. At the end of the season an experimental hauling was actually carried out over a length of 2,800′. This was quite successful but owing to the anticipated break of monsoon and an accident to the main line cable, the experiment was not so complete as desired. If long distance haulage can be successfully carried out, Government will be saved an outlay of lakhs of rupees on the construction of extraction roads. The results of this experiment in mechanical haulage of timber have been most successful. Some of the best teak timber in Kanara has been locked up in the Nagzari valley for centuries and the area was always hitherto looked upon as inexploitable. Now with the help of mechanical appliances and mechanical traction timber is being extracted from this area at a cheaper rate than is actually charged by contractors in very much easier localities. The scheme was planned and started by Mr. T. S. Pipe, Superintending Engineer, Forest Department, and the work is being carried out under his control. Thanks to him and Mr. Holmes and the Forest and Engineering staff working with them Government is now securing a large and increasing revenue from forests which yielded nothing up-to-now.

Mechanical Transport.—During the year one outfit consisting of a Foden Steam Tractor and trailer worked on the transport of sleepers from Kirwatti saw mill to Hubli railway station, a distance of 32 miles. A second steam tractor of the Super Sentinel type was purchased in March 1926 and employed on the transport of logs from the Nagzari exploitation.

Foden outfit.—The rate for carting sleepers had recently risen very high and hence the Foden tractor was employed and started work in August. Work was held up for a month owing to heavy rains and later on considerable overhaul repairs were found to be necessary. These occupied two months. Later on the tractor sustained light injuries owing to the steering control chain having given way. These mishaps put up the cost somewhat. The over-all running costs amount to Rs. 7·4 per ton-mile or 9¾ annas per sleeper. This is higher than the usual carting rates. However, in all over 8,000 sleepers were carted. A point which has to be remembered in the favour of this outfit is that, before its introduction on this particular work, the rate demanded by bullock cartmen was exorbitant but as a result of its working, the bullock carting rates were lowered immediately, an advantage that it is not possible to estimate in actual figures.

This is the third season the Foden outfit has been working. The figures for the year are as follows :—

	Rs.
Running charges (labour, stores, repairs) ..	2,157
Toll charges	82
Interest 6% and depreciation	2,392
Supervision	433
Total ..	5,074
Total tons hauled	365·6
Total work done ton-miles	10,966
Cost per ton-mile	7·4 As.
Total number of sleepers transported	8,124
Cost per sleeper	10 As.

To these must be added the expenditure of establishment during the idle period (3 months).

This amounts to Rs. 210.

This increases the cost per ton-mile by ·33 As. and the cost per sleeper by ·41 As.

Super-Sentinel Tractor.—This outfit was purchased and only started work in February and was employed on transporting logs from Nagzari Valley to Dandeli Depot a distance of 7 miles. It carried on work till the close of the carting season in May.

The figures for the year are :—

	Rs.
Running costs (labour, stores and repairs) ..	1,800
Depreciation	1,799
Supervision	..
Total ..	3,599
Total tonnage transported	306
Total work done in ton-miles	2,143
Cost per ton-mile	Rs. 1-11-0
Cost per khandi for this trip works out at ..	„ 2-15-0

The cost for bullock transport over the same journey is Rs. 2-8-0 per khandi. The work done by the tractor is equivalent to about 14 bullock carts.

This was the first season the tractor has worked since it was purchased and the costs will undoubtedly be reduced considerably. During part of the time the driver was sick and was not strong enough to complete two round trips a day regularly. With the loading arrangements we have at present the tractor can easily accomplish two round trips per day. Another year it will be advisable to have two drivers. The output

will then be easily maintained at 300 logs per month. One such outfit should be able to transport about the same number of logs as can be extracted with one of the logging outfits at present in use.

Saw mills.—Six Government saw mills worked during the year at Karanjara and Chikhalda in the Dangs, at Badgi in Peint, at Dandeli, Bomanhalli and Kirwatti in Kanara. The mill at Tambepar was removed to, and erected at, Haste in the Northern Circle and commenced working on the 1st April 1926. The outturn in the Northern and Southern Circle mills during the year under report was 107,433 and 166,197 cft. as against 119,339 and 159,016 during the last year, the decrease in the Northern Circle of 11,906 cft. shared by all the three being due to mills cutting a bigger proportion of boards and planks which entails more labour. Southern Circle mills showed an increase of 7,181 cft. in spite of the fact that during the year under report only 3 mills were working as against 4 mills working last year. The Forest Engineering Branch continued to attend to technical matters connected with maintenance and running of the mills.

Extensions have been made and the condition of machinery, equipment, and mill stores, etc., has been improved. All stores have now been standardised and a systematic system of accounts for stores introduced. As a result of efficient working and management the sawing costs have been brought down from 7·7 annas per cft. last year to 6·12 annas per cft. during the year under report. This represents a saving of over a quarter of a lakh of rupees. The standard of sawing has greatly improved and there is no doubt that there have been advances all round.

The private mill at Waghai (Northern Circle) ceased to work on royalty system and became an entirely private concern while that at Gunjawati (Southern Circle) continued to be worked as usual and supplied only 1,606 sleepers and 2,198 cft. sawn wood as against 4,190 sleepers and 2,316 cft. sawn wood last year. Towards the end of the year another private saw mill was erected by Mr. Syad Nasroddin at Hanmapur in Kanara, E. D.

Trading accounts of the six Government saw mills stand as below :—

SURAT DIVISION

The mills, on the whole, show a net profit of Rs. 1,83,543 as against Rs. 1,62,057 last year, the contribution of the Northern Circle and Southern Circle mills to the profit being Rs. 35,530 and Rs. 1,48,013 respectively. Karanjara mill in the Dangs shows a loss of Rs. 9,446. This mill is old and worn out and will shortly be scrapped, and as there is now a good demand for the purchase of standing coupes in that neighbourhood it is proposed to stop departmental operations at Karanjara in the near future. Badgi mill which showed a loss of

Rs. 2,966 last year now shows a net profit of Rs. 5,251. For the first time, Dandeli saw mill shows a profit of Rs. 19,739 and this result is in the main due to the raising to an economic level of the prices for indent material supplied to the M. and S. M. Railway, to increased production of M. G. sleepers, and general improvement in working and management. The Bomanhalli saw mill again showed a profit of over a lakh of rupees, due to a very great extent to the able management of Mr. Wagle, the Ranger in charge.

Cart Depots.—The Government Cart Depots in the Southern Circle were closed down with the exception of Kirwatti, which is indispensable on account of the scarcity of private carts in that neighbourhood. The carts of this depot, when not employed on the transport of officers' kit, were used for carting timber and sleeper pieces. Unfortunately eight animals were lost through rinderpest during the year; the depot was however worked at a small profit of Rs. 29, as compared with a deficit of Rs. 997 in the previous year.

Messrs. Howard Brothers' Timber Agency

The Account with this firm to the end of the financial year is given in the statement below :—

Description of timber	Receipts	Disposals	Balance in stock

Coupes of Panch Mahals, Surat, North and West Thana and West Nasik, Gurcharans of Thana Divisions and improvement felling coupes of Dangs sold better than last year and hence the increase in revenue from timber in the Northern Circle. Decrease in the value of fuel was due to the thinning coupes being sold standing and the revenue realised credited to timber as it was impossible to separate the revenue from timber and fuel in the case of sales of standing material. Two most gratifying features are the recovery of the prices of coupes in Thana to their old level and

the increasing sales of coupes in the Dangs, due to the good market in Gujerath.

In the Central Circle the decrease in the value of timber is attributable to slump in timber market, poor agricultural season in North and West Khandesh and to low prices obtained for coupes in Poona and Kolaba Divisions. The increase in the revenue from fuel is in the main due to sale of settlement plots in East Khandesh.

In the Southern Circle the decrease under timber is due partly to the recovery of large outstandings in the previous year, an item which did not come into the accounts of the year under review. For the rest the difference is due to lower prices obtained for Haliyal and Belgaum Teak Pole coupes. Also last year Rs. 45,250 were realised as the price of a coupe in Nagargali Range and credited to timber while this year the corresponding coupe contained poor growth and its price was credited to fuel. The Madras and Southern Maratha Railway having stopped taking fuel from the Department the fuel coupes in Kanara W. D. and Belgaum were sold standing, hence the increase in revenue from fuel in the Southern Circle.

In Sind coupes and erosion strips realised better prices than in the previous year.

Wood for match-making was collected by various firms in the following Districts :— Panch Mahals, Surat Dangs, Thana, Kolaba, Satara, Belgaum, Kanara, Sukkur. Some half dozen or more match factories dealt direct with the Forest Department and an Ahmedabad firm was given by Government a very great concession in price for a period of ten years. As a matter of fact the trade in these woods is fast developing and there is keen competition amongst the various firms, in view of which there is now no need to give any more special concessions, as the required woods will in future be worked out by contractors in the usual way. Plantations of trees suitable for match-woods are being made in Panch Mahals, Thana and Kolaba Districts.

In the Northern and Central Circles fewer cattle grazed and low prices were obtained for kurans. Very high prices were obtained for hirda and shigekai in Satara Division in the Central Circle and sale of Anjan leaves which were in demand in the Central Circle due to shortage of fodder brought in Rs. 11,940. Departmental collection of hirda in Kanara Southern Division explains the decrease in value of "other minor produce" in the Southern Circle ; and departmental collection of lac in part, and low prices paid by contractors both for lac and right to collect Babul pods were responsible for the decrease in value under "other minor forest produce" in Sind.

Manganese.—The Shiroli manganese mine in Kanara District was worked by the lessee throughout the year and 1,743 tons of ore were extracted, as compared with 780 tons in the previous year. The average royalty per ton amounted to As. $3\frac{1}{4}$, a very low rate, and the amount realised by Government is quite insufficient to repair the damage done by the lessees' carts to the forest roads. There was considerable activity among manganese miners and prospectors in the hills to the south-west

of Khanapur (Belgaum District) and several applications have been received for licenses in the Supa Petha of Kanara District.

(*iii*) *Rights, Privileges and Free Grants*

The following is a comparative table of the quantity and value of forest produce removed by right and privilege holders and free grantees during the years 1924-1925 and 1925-26 :—

Circle	Agency	Major Forest Produce			
		Timber		Fuel	
		Cft. in thousands	Value	Cft. in thousands	Value
			Rs.		Rs.

	F.	11	3,969	1	18,704
Southern	C.	300	72,000	3,000	129
	F.	31	7,730	11	37,580
Sind	C.	....	....	10	210
	F.	29	2,969	3	150
					6
Total for 1925-26 ..	C.	300	72,000	9,021	2,04,033
	F.	86	18,192	70	783
Total for 1924-25 ..	C.	7	2,000	6,427	1,39,394
	F.	233	30,759	14	243

Circle	Agency	Minor Forest Produce			
		Bamboos	Grass and Grazing	Other minor produce	Total
		Rs.	Rs.	Rs.	Rs.
Northern	C.	7,981	2,95,387	16,190	3,19,558
	F.	120	....	132	252
Central	C.	28	7,754	2,564	10,346
	F.	94	5	2,068	2,167
Southern	C.	45,000	2,84,339	20,000	3,49,339
	F.	132	38,019	966	39,117
Sind	C.	....	3,481	....	3,481
	F.	....	6,180	17	6,197
Total for 1925-26 ..	C.	53,009	5,90,961	38,754	6,82,724
	F.	346	44,204	3,183	47,733
Total for 1924-25 ..	C.	9,809	5,98,737	28,654	6,37,200
	F.	316	45,475	2,976	48,767

C=Concessionists. F=Free Grantees.

The apparent increase in the quantity of timber, fuel, and bamboos allowed to Concessionists is due to the inclusion this year of estimated figures of the quantities taken by privilege holders in the Southern Circle, which was not done last year. Last year an abnormal quantity of timber was given in free grants in Sind, owing to many houses being destroyed by excessive floods.

(c) Outturn and sources of forest Produce

The outturn from all sources of forest produce during the two years 1924-25 and 1925-26 compares as follows :—

Circle	Year	Major Forest Produce		
		Timber cft. in thousands	Fuel cft. in thousands	Sandalwood
				Rs.
Northern	1925-26 ..	2,747	12,564	211
	1924-25 ..	2,700	11,286	348
Central	1925-26 ..	561	4,920	2,513
	1924-25 ..	742	5,574	1,716
Southern	1925-26 ..	2,513	9,440	82,794
	1924-25 ..	2,105	7,722	73,945
Sind	1925-26 ..	178	18,076	....
	1924-25 ..	341	19,185	....
Total ..	1925-26 ..	5,999	45,000	85,518
	1924-25 ..	5,888	43,777	76,009
	Difference ..	+111	+1,223	+9,509

Circle	Year	Minor Forest Produce		
		Bamboos	Grass and Grazing.	Other
		Rs.	Rs.	Rs.
Northern..	1925-26 ..	63,837	4,31,345	94,327
	1924-25 ..	50,807	4,49,123	57,948
Central	1925-26 ..	10,227	5,88,442	74,336
	1924-25 ..	9,586	6,62,379	79,490
Southern	1925-26 ..	1,25,882	4,05,436	83,867
	1924-25 ..	71,942	4,03,690	82,383
Sind	1925-26 ..	....	47,992	46,996
	1924-25 ..	....	45,310	56,682
Total ..	1925-26 ..	1,99,946	14,73,215	2,99,526
	1924-25 ..	1,32,335	15,60,502	2,76,503
	Difference ..	+67,611	−87,287	+23,023

Of 23,98,296 animals admitted to grazing in the forest 5,45,789 were allowed to graze free of fees. Corresponding numbers for the last year are 24,85,764 and 5,47,595.

The total expenditure on management of State forests was :—

	1924-25	1925-26
	Rs.	Rs.
Northern Circle	8,93,869	4,82,984
Central „	1,03,712	91,248
Southern „	10,49,352	10,56,141
Sind „	1,20,627	1,00,092
Total ..	16,67,560	17,30,465

The increase is due to more expenditure on roads, buildings in the Northern and Southern Circles.

under A-X —Work Advances which are recoverable.

The marked feature of the year is that the gross revenue rose by Rs. 1,48,954 over the figure of the previous year and by Rs. 5,00,412 over the average of the preceding five years. The surplus too was more than last year by Rs. 86,296 and more than the average of the previous quinquennium by Rs. 6,52,369. It is particularly gratifying to note that notwithstanding the fact that capital expenditure on communications and buildings has greatly risen, the financial results of the year show a great improvement over those of any previous year except the one "boom" war year of 1918-19 during which the gross revenue and surplus were respectively Rs. 80,12,149 and Rs. 37,15,541. The increase in both the gross revenue and surplus is shared by the Northern and Sind Circles and is partly counterbalanced by decreases in the Central and Southern Circles. The better results in the Northern Circle are attributed to the sale of accumulated stocks of sawn timber which remained unsold last year and to increased sale of material and better prices realised from the sale of improvement and clear felling coupes, gurcharans, thinnings and bamboos in Surat, North Thana and West Nasik Divisions. The improvement in this Circle is also to a great extent due to the initiation of a more liberal policy of road construction than hitherto and it is hoped that the revenue will go on increasing proportionately to the further progress in communications which is being urged as the financial position of the Department permits. The revenue of the Dangs has risen of late years from one to six lakhs, mainly on account of increased transport facilities. There is still much to be done to improve the roads in the Dangs and in Peint, and money wisely spent on roads there will prove an excellent investment. In Sind departmental operations, punctual recoveries of dues, better prices realised for coupes, thinnings etc., and large areas being given out for cultivation have raised the gross revenue.

In the Central Circle the decrease in the revenue by Rs. 1,63,493 is mainly due to the depression in trade which affected the sale of both major and minor produce and which necessitated the keeping of many coupes unsold in most of the Divisions. The decrease in the Southern Circle is due to less revenue realised for coupes, non-supply of fuel to the M. & S. M. Railway and no market for coupes hitherto exploited for the Railway and to non-payment of instalments and purchase money before close of the year by contractors of Kanara Northern and Eastern Divisions. It is however gratifying to know that during the current year there has been a recovery in both the Central Circle and Southern Circle, and there is every reason to hope that the revenue of the Presidency as a whole and of each Circle will show a steady expansion year by year from now onwards, although no sudden great rise is to be expected. Steady development on safe lines should be aimed at.

On the whole there has been a decrease in the expenditure under A-Conservancy and works and an increase under 8-A Capital Outlay charged to Revenue. The decrease under the former head is mainly due to provision being made under "Capital Outlay" for purchase of stores, tools and plant and for organisation and improvement instead of under A-Conservancy and works. The increase under the latter head is partly

due to the reason last given and partly to more expenditure than last year on works and saw mill stores in the Northern and Southern Circles.

The decrease in expenditure under Establishment is chiefly due to absence of officers on leave, reduction in the rates of travelling allowance and less number of Ranger students undergoing training in the Madras Forest College, Coimbatore.

The sources of revenue and the heads of expenditure are analysed and compared below :—

CHAPTER VI

Research and Experiments

A research branch was started under the control of the Chief Conservator, and research on the following twenty subjects has been started. It is too early yet to give any indication of the results, but these will be carefully recorded from time to time as received :—

Serial No.	Subject	Divisions in which research is to be conducted
1	Reasons for variation in results of teak regeneration work.	North Thana, East Thana and West Thana.
2	Germination tests of teak seeds	Surat, Kolaba, West Khandesh, Belgaum.
3	Comparative results in teak plantations of— (*a*) dibbling of seed. (*b*) use of seedlings of a few weeks old. (*c*) use of one year old transplants.	E. D. Kanara.
4	Effect of thinning of teak coppice of different ages.	East Thana.
5	Effect of different degrees of thinning in teak plantations of different ages; and of under-planting with shade-bearers.	West Nasik, West Thana, Belgaum, Kanara N.D., E.D., S. D., and W. D.,
6	Effects of (1) reduction and (2) abolition of watering in casuarina plantations.	Kanara, W. D.; Kanara, S. D.
7	Annual girth increment of sandal ..	Belgaum, Dharwar-Bijapur.
8	Increment of babul (Acacia arabica) under different degrees of thinning.	Hyderabad.
9	Propagation of lac on ber (Zizyphus Jujuba)..	Karachi.
10	Economic age for cutting Bahan (Populus euphratica) coppice and degree of thinning required.	Shikarpur.

Serial No.	Subject	Divisions in which research is to be conducted
11	"Stoning" of teak seedlings as a protection against animals and an aid to their growth.	East Khandesh, Poona, Thana.
12	Artificial propagation of Rosha grass ..	North Khandesh, West Khandesh.
13	Propagation of Hirda	Satara, Poona.
14	Propagation of Bamboos	Kolaba.
15	Relative value of different species for making charcoal.	Satara.
16	Effect of improvement fellings on diameter growth.	Surat.
17	Effect of cutting back superfluous shoots of two year old teak seedlings.	West Nasik.
18	Investigation into the effect of shade on Lantana.	Belgaum.
19	Coppicing of Anjan	East Nasik, East Khandesh, West Khandesh.
20	Preservation of natural Anjan Seedlings ..	East Nasik, East Khandesh, West Khandesh.

Experiments

Early burning.—Early burning was continued in some areas with a view to ensuring the protection of the forests against destructive fires later on. There is considerable diversity of opinion as to whether this does more good or harm, and further investigations are in progress.

"Stoning" of seedlings.—In East Khandesh the "stoning" of seedlings is found to protect them from animals and, by preserving the moisture in the soil, to help their growth. Large flat stones are the best, and they should be placed near, but not touching, the plants.

Anjan coppice.—In North Khandesh it was established in Anjan sample plots that the greater the height of the stool within reason the more profuse and vigorous are the coppice shoots. It was found in East Khandesh that, so long as Anjan shoots are protected against browsing during the growing season, they suffer little injury from browsing during the rest of the year.

Improvement of grass areas.—Experiments are in progress in East Khandesh and Poona Divisions in collaboration with the Agricultural Department to ascertain the effects of opening and closing areas to grazing during different seasons of the year.

Charcoal.—Experiments in charcoal burning were continued in the Central Circle and promise to be successful, but owing to the fluctuating state of the market at present it is difficult to make much progress.

Eucalyptus plantations.—The experimental plantations near Mahableshwar and Matheran are reported to have proved a complete failure.

Lac.—Further attempts are being made to propagate lac in the Northern Circle and Central Circle with the help of the Agricultural Department. Experiments were continued in the Karachi and Hyderabad

Divisions, which are described as follows by the Conservator of Forests, Sind Circle :—

"*Karachi Division*

Hot weather swarming commenced on July 16, 1925, and continued until August 5. Infection was started on July 17, and 462 trees (323 ber and 139 babul) were infected. The brood sticks were tied to succulent branches resulting from the lopping of the trees in October and December 1924. The condition of the brood in July was poor and weak and rain fell the day following the tying of the sticks. The rain washed away the lac and killed the insects and only in compartment 9 of Khathar forest was the infection successful and only to the extent of 50 per cent.

The cold weather swarming commenced on November 1st, and continued until December 31, and 835 previously lopped trees (763 ber and 72 babul) were infected by the basket and joori methods.

The frosts of late December and January did no appreciable harm and the crop was excellent up to February 1924 when the 'Chauwao' winds began and continued until August 23 damaging some 40 per cent. of the crop. The crop improved somewhat when the damp southern winds started and the heavy rains in the middle of May appeared to do more good than harm.

The experiments would seem to show that (1) Ber is a hardier host tree than Babul and the effects of 'Chauwao' on it are less than on Babul; (2) the trees need shelter from the harmful 'Chauwao' requiring protection belts in the north, north-east and east directions; (3) the basket method of infection gives the best results.

A plantation of 10 acres of pure ber is being made in Khathar and Khatro forests, sheltered by protective belts, as a future area for further experiments.

Hyderabad Division

Similar operations were carried out in Hyderabad Division on a smaller scale.

The trees lopped in the winter of 1924 were infected in July 1925 but owing to the poor quality of the brood lac the infection was not very successful.

Experiments were conducted again on Persa Parsi (*Prosopis glandulosa*) but without success, though natural lac on this species appears to do quite well."

Sandalwood.—In the Southern Circle sowings of sandalwood were made in open grass land. Barely 10 per cent. of the seedlings survived, but these are doing well, and seem to have formed root attachments with shrubs in the vicinity.

Mahogany.—The surviving Honduras Mahogany plants of the 1925 monsoon in the Southern Circle have attained an average height of 4½ feet.

Padouk sowings have not been a success in the Southern Circle.

Timber specimens.—Six sleepers of *Terminalia tomentosa, Terminalia paniculata, Anogeissus latifolia* were sent from the Southern Circle to Sweden for seasoning under Forcell's drying process. Logs and sleepers of Jamba (*Xylia xylocarpa*) were sent to Dehra Dun for seasoning and other tests.

Picking sticks.—Experiments initiated by Mr. T. S. Pipe are in progress in several cotton and jute mills to test various Indian timbers as substitutes for imported hickory sticks.

Salai gum.—The Eastern Development Corporation, Ltd., did no work in connection with the extraction of gum from *Boswellia serrata* in North Khandesh.

Paper pulp.—Little, if any, progress was made by the firm which have been given a license to extract grass from the North Khandesh forests for the manufacture of paper pulp.

Rosha oil.—The Essential Oils Syndicate of Dehra Dun did comparatively little work in their Rosha oil contract.

CHAPTER VII

Administration

The office of the Chief Conservator of Forests was held throughout the year by Mr. A. G. Edie.

The territorial Circles were held by the following officers :—

Northern Circle	..	Mr. G. S. Butterworth from 1st April to 23rd October 1925.
		,, G. E. Marjoribanks from 24th October 1925 to end of the year.
Central Cirlce	..	,, C. E. L. Gilbert from the beginning of the year to 2nd October 1925.
		,, E. M. Hodgson from 3rd October 1925 to 31st March 1926.
Southern Circle	..	,, H. L. Newman throughout the year.
Sind Circle	..	,, J. Walker from 1st to 6th April 1925.
		,, P. E. Aitchison from 7th April 1925 to end of the year.

The following officers worked in the Forest Engineering Branch :—

Mr. T. S. Pipe as Superintending Engineer throughout the year.

,, R. V. Alexander as Forest Engineer, Northern Division, throughout the year.

,, H. C. Holmes as Forest Engineer, Southern Division, throughout the year.

,, T. K. Mirchandani, Extra Assistant Conservator of Forests, under the Superintending Engineer throughout the year.

Changes among Divisional Forest Officers were frequent chiefly owing to absence of officers on leave, as many as 13 out of the total number of 28 Divisions having changed hands during the year. Fourteen Divisions were held wholly by Imperial Officers, 4 for part of the year by Imperial and for part of the year by Provincial Officers, and 10 wholly by Provincial Officers.

At the close of the year the number of officers attached to Divisions as Assistant Divisional Forest Officers or Sub-Divisional Forest Officers was 2 Imperial and 9 Provincial, excluding 2 who were in charge of Ranges.

No new recruits were added to either service during the year.

Subordinate and Clerical Establishments.—Eight new Rangers trained at the Madras Forest College at Coimbatore joined service during the year. Eight new students were selected for the course of 1926-28 at that College during the year.

The Foresters' training class was held as usual in the Northern Circle under the supervision of Mr. A. S. Nachan, Ranger. Twenty-five subordinates of the Northern and Central Circles were admitted to the class, of whom 6 were sent back as unfit or on account of illness. Of the remaining 19 students, 17 passed the examination. A scheme was proposed by the Conservator of Forests, Southern Circle, for adoption in his Circle under which two selected men annually in each Division are to be given the required training locally by a well-qualified Ranger selected by the Divisional Forest Officer. This scheme was proposed in order to avoid dislocation of work by complete removal of a dozen men or so to some particular centre for a period of about 6 months each year and the difficulty of securing an Instructor to train them. This scheme is now being given a trial in the Southern Circle.

Casualties and Punishments

Particulars	Northern Circle	Central Circle	Southern Circle	Sind Circle	General Direction	Total	
						1925-26	1924-25
1 Retirements ..	12	27	12	2	..	53	58
2 Deaths	11	13	16	5	..	45	53

4 Prosecutions ..	1	..	2	..	..	3	4
5 Degradations ..	6	7	3	7	..	23	41
6 Dismissals, Removals, etc.	24	33	22	14	..	93	78
Total 1925-26 ..	72	91	65	48	..	276	..
Total 1924-25 ..	96	79	61	51	1	..	288

The health of the Forest Staff was on the whole fairly good. The premature death from pneumonia of Mr. Nenumal Hemandas, one of the best Range Forest Officers in Sind, is much regretted, and several other Rangers who had done good service died whilst on duty.

A Forest Guard, Bhiku Chandru by name, who had gone out as usual to patrol the forests in the Belgaum Division on 20th June 1925 never returned home. On a search being made his dead body was found in the forest covered with pieces of fuel. The Police investigation resulted in the prosecution of a villager of Sawargali on a charge of murder but he was acquitted by the Court of Sessions for want of evidence. The deceased guard's widow has however been granted a compassionatory pension of Rs. 9 per month.

A case of assault on forest subordinates in West Vada resulted in the conviction of all the accused. Another aggravated case of assault and wrongful confinement of forest class students, lodged by the Police, resulted in the conviction of an Inamdar in Bhiwandi Taluka.

The prosecution of a Forester and a Forest Guard in the Panch Mahals pending last year resulted in acquittal on appeal to the District Judge. One Forester and one Depot Officer were prosecuted in the Belgaum Division, the former for misappropriation of grazing fees and the latter for embezzlement in the Tavargatti Depot accounts. Both were found guilty and convicted and in consequence dismissed from service.

The work of the Rangers and other subordinate protective staff and office establishment has been reported to be satisfactory, with only a few exceptions.

Civil suits.—A suit which was lodged against thinning contractors of East Thana Division in the Northern Circle is pending in the Thana Court. Of the three suits filed against the Department last year in the Southern Circle, two were dismissed with costs and one was decided in favour of the plaintiff. Another suit of last year filed by the Department in that Circle ended in a decree being obtained against the contractor and the decretal amount is in the process of recovery. Government have sanctioned the institution of fresh suits against 3 persons for the recovery of revenue outstandings and advances amounting in all to Rs. 4,254. The Southern Circle has continued to be burdened with much litigation most of which has reference to default cases of many years standing. The stricter care now being insisted on in the selection of contractors, in drafting of agreements and sale terms, and in the execution and renewal of security bonds and the like are gradually eliminating this unsatisfactory feature.

Inspection and Tours

His Excellency the Governor of Bombay camped at Yellapur in the Southern Circle in April 1925.

The Honourable Mr. A. M. K. Dehlavi, Minister in charge of Excise and Forests, visited the forests in East Khandesh, Karachi and Hyderabad Divisions during the year.

The Chief Conservator of Forests visited all the forest Districts of the Presidency proper.

Divisional and other offices were inspected as usual during the year. No irregularities of a serious nature were disclosed by the inspection.

Land Revenue Administration, etc.

The Divisional Forest Officer, West Nasik, continued the Land Revenue and Excise administration of the Peint Taluka. The Divisional Forest Officer, Surat, continued to be *ex-officio* Assistant Political Agent, Dangs.

The Revenue management of the 7 villages in East Khandesh transferred to the Forest Department in Government Resolution, Revenue Department, No. 6264 dated 4th November 1922 was satisfactory.

The charge of the Akrani Mahal continued to be managed throughout the year by Mr. F. X. Saldanha, Extra Assistant Conservator of Forests, as *ex-officio* Mahalkari and Excise Inspector. Land assessment collected according to the Nazar Andajee system amounted to Rs. 5,363 as against Rs. 5,271 in the previous year, there having been a slight increase in the area cultivated. The total amount of tagai distributed to the people was Rs. 3,000 against Rs. 5,000 in the preceding year, for the purchase of bullocks and seeds. Tagai recoveries have been very satisfactory as Rs. 5,794-6-0 as principal and Rs. 850 as interest were recovered during the year. The Bhil Boarding School is still making slow headway. It is hoped that it will show better progress under the new Head Master who is said to be a keen man taking lively interest in his boys. The Mission School at Mundalwad for boys and girls continued to make satisfactory progress with an average daily attendance of 45 students. There was a serious outbreak of sickness in the cold weather among both men and cattle. The Government dispensary is coming to be more and more appreciated and the daily attendance has risen considerably. A proposal to convert the present Public Works Department Store house into a dispensary at a cost of Rs. 2,325 was given up, the Civil Surgeon having expressed his opinion that the building is not suitable for the dispensary. The Chavdi where the dispensary is now located will probably eventually be selected for its permanent housing after effecting some additions. Two new chavdis and a well were constructed during the year. No progress was made with the Dhadgaon-Shahada road as no funds were sanctioned by Government pending submission of a complete estimate for the whole project. A Khillari bull has been obtained for cattle breeding on the premium system from the Agricultural Department. This is the third year of the Excise Administration in the Akrani by the Forest Department. There are few changes to note. The Personal Ledger account system continues. The account which opened with a balance of Rs. 73,766-13-5 closed with a balance of Rs. 1,16,443-0-9. After deducting the cost of Distillery staff, the balance represents a net profit of Rs. 1,14,140 approximately. The sales and revenue during the year amounted to 32,262 gallons and Rs. 48,393 as against 29,635 gallons and Rs. 44,453 in the previous year. The increase in consumption of liquor

of nearly 2,626 gallons is mainly accounted for by a peculiar sickness which raged in the Akrani from December 1925 to March 1926 and for which liquor was used as a specific. Six offence cases as against 2 in the previous year were detected during the year, and the offenders were found guilty and fined in all the cases. The increase in the number of offences detected is attributed chiefly to the empowering of the Police Sub-Inspector to investigate the cases. The total excise revenue was Rs. 48,512 against Rs. 44,535 in the previous year, while the expenditure was Rs. 14,001 against Rs. 15,769 in the preceding year. The increase in revenue is mainly due to larger consumption of liquor and the decrease of expenditure to the absence of new works like the Mhowra godown of last year. In all 39,288 gallons of 60° U. P. liquor was manufactured against 37,986 gallons in the previous year. Owing to the activity of a band of dacoits, some of the liquor shops were removed to safe sites nearer the villages as a safeguard against thefts. Proposals for constructing pucca buildings for shops and quarters for shop-keepers are under consideration.

The Raisingpur Estate continued to be managed by the Forest Department under the Court of Wards, a Forester being in charge throughout the year.

The three Forest Mahals of Dandeli, Kulgi and Virnoli in Kanara Northern Division and Kirwatti and Bilki in Kanara Eastern Division continued to be under the administration of the Forest Department. The inhabitants of these Mahals appeared contented and their relations with the Forest Department continued to be satisfactory.

The existing kumri assignments in the three groups of the Supa Range in Kanara Western Division continued during the year without any change. The kumri holders in the Belgaum Division appear to be contented with the scheme introduced last year, the only matter about which there was dissatisfaction being the rate of 12 annas per acre charged for the land. Recommendations to reduce the rate to 4 annas per acre await the approval of Government.

CHAPTER VIII

General Remarks

The year was a successful one financially and good progress was made with works of development and improvement. More money is needed for such works, which will bring in increased revenue in the near future. Steady progress is now being made on safe lines and no new project is entered into without careful scrutiny first by the Departmental officers and finally by Government.

The proposals for the systematic exploitation of malki teak in Thana by the Forest Department received the sanction of Government, and an increase in revenue is to be expected from this source in future years. The Conservator of Forests, Central Circle, calls attention to the present methods of disposing of malki teak in Kolaba District which he considers will lead to confusion and loss of revenue.

In the Northern Circle no more land was given out during the year for in-forest cultivation; but 36,774 acres of old settlements were cultivated on an assessment of Rs. 39,876. In the Central Circle eight new in-forest settlements were opened in the three Khandesh Divisions and the older settlements were improved by providing more land and water facilities. The panchayat system introduced two years ago worked well. Two thousand five hundred and fifty three acres were cleared of tree growth with a view to the extension of various settlements. A sum of Rs. 3,609 was spent in North Khandesh on the improvement of the water supply in the settlements, and in East Khandesh Rs. 1,518 on the improvement of water supply and cart-tracks. Tagai advances were made where necessary when funds were available. In the Southern Circle land was given out to Berads in the Gokak and Gujnal Ranges of Belgaum Division as an extension of grants made in former years. These Berads are contented with what has been done for them and gave good help to the protective establishment during the year. The Berad Settlement at Dandeli did useful work as in the past and there were no complaints of any kind.

The demands of the Accountant General's office and the stricter control now exercised over account matters have led to a heavy increase in the work of all the Circle and Divisional Offices. Some increase in establishment will be necessary in the near future.

The relations between the Forest Department and other Departments continued to be of a cordial nature.

The Committee appointed in Government Resolution No. L. C. 1374 dated 26th January 1925 to enquire into forest grievances visited places in Poona, East Khandesh, West Khandesh, Thana, Kolaba, Nasik, Satara, Panch Mahals, Kanara and Belgaum Districts, from which petitions of grievances had been received. The proceedings of the Committee were informal throughout as ordered by Government. All who wished to put their views before the Committee were allowed to do so and full consideration was given not only to the written petitions received but to all points brought up during the meetings which took place in various offices and buildings and very often in the forest itself. Large numbers of petitions of grievances were brought forward, some of them common to nearly all the Districts of the Presidency, some peculiar to a few Districts only, and some pertaining to individual villages or even individuals. All of these were investigated, as many as possible on the spot and the rest either at Committee meetings or by members individually. The people of 11 out of 13 districts from which petitions were received were interviewed during the tour and matters were enquired into on the spot. The deliberations of the Committee lasted beyond the year under report up to end of August 1926, and the final report was submitted soon after for the consideration and orders of Government.

The remarks of the Divisional Commissioners on the Circle Reports are printed below as appendix A.

APPENDIX A

Remarks of Commissioners on Circle Reports

Sind Circle

Commissioner in Sind.—(Mr. P. R. Cadell, C.S.I., C.I.E.):—

"The financial results of the year were good, and the Department was worked with a marked absence of friction either with the public or with other Departments.

The forests of Sind will have increased importance and opportunity with the improvement of the water supply. It is especially desirable that the growth of valuable trees such as Kandi and Tali should be fostered, useful as the Babul is in its own sphere."

Commissioner, Northern Division.—(Mr. G. E. Chatfield, C.I.E., I.C.S.):—

"Government Orders on Mr. Perry's report on the re-settlement of the Thana Gurcharan lands which were awaited have now been received. According to these orders 4,410 acres of Gurcharan land will be included in the reserved forests. His proposals regarding the formation of Forest Mahals, however, still await the decision and orders of Government.

The proposals for the disforestment of certain lands suitable for agricultural purpose in the Panch Mahals are still under discussion between the Commissioner and the Collector, as their details require to be carefully worked out.

2. The report on the revision of the working plans for the Panch Mahals was ready and submitted to the Conservator. The most important Working Plan for the entire Dang Forests was taken in hand, and will soon be completed.

3. The total number of forest offences increased from 5,036 to 5,244 the increase being chiefly under fires and illicit grazing. In this respect Panch Mahals is the worst offender, Eastern Thana taking the second place. Out of 689 fire cases 37 were taken to court, 136 were compounded and the rest were undetected. The area under fire protection remained practically the same as in the last year. The area burnt slightly decreased from 119 square miles to 114. Proposals for powers to inflict communal punishment in respect of illicit grazing and illicit fellings are under the consideration of Government, but as remarked by the Conservator mere punitive measures alone are not enough. A system of holding informal Darbars and giving rewards thereat to villagers who help in fire protection has succeeded well in Surat and might with advantage be tried elsewhere.

4. The grazing fees show a decrease of Rs. 2,784 having declined from Rs. 82,667 to Rs. 79,883. The number of cattle impounded was on the other hand 43,835 as against 36,014 in the last year.

5. The total revenue derived from the working of the forests increased from Rs. 23,22,961 to Rs. 28,67,190 during the year. The total expenditure also increased from Rs. 10,86,094 to Rs. 11,05,468 showing

a surplus of Rs. 17,61,772 as against Rs. 12,36,867 in the previous year. Thus there was a net increase in revenue of Rs. 5,24,855. Surat, North Thana and Panch Mahals are the districts which substantially contributed to this excellent result. The increase in revenue in the Panch Mahals is mainly due to increased value of forest resources due to a prosperous year and good management, while that in Surat is ascribed partly to accumulated stocks in the saw-mills which were sold during the year and partly to extra receipts of about a lakh from improvement and clear felling coupes and sale of bamboos. In North Thana the increase in revenue is reported to be the result of improved prices for coupes, gurcharans and thinnings. On the whole in spite of the continued depression in trade the financial results achieved may be considered as very satisfactory.

6. The three saw mills worked departmentally continued to work during the year under report. Their total outturn however fell from 119,339 c. ft. to 107,433 c. ft. and the value of the material sawn from Rs. 2,16,077 to 1,90,852-7-0 during the year. The decrease in the outturn is attributed to cutting a bigger proportion of boards and planks, which entail more labour. The trading accounts show that the Chikhalda and Badgi mills continued to do their work with increased profits while the Karanjara mill which brought in a profit of Rs. 32,383 last year showed a net loss of Rs. 9,445-2-0. No explanation is forthcoming for this great and abnormal variation of over Rs. 41,000 in the working of this mill.

7. The expenditure on communications and buildings increased from Rs. 44,974 to Rs. 1,11,825 during the year of report. The increase under this head in the Dangs has more than amply been compensated by an increase in the revenue of these forests. The Commissioner again emphasises the great need for further expenditure on roads and fully endorses the Conservator's remarks that 'development of the Dang revenue is more a matter of roads than anything else and with a complete system of interior transport linked up to outside communications success will be assured.' It is hoped that Government will accord their sanction to the twenty year programme of road work proposed in the new Dang Working Plan and provide the necessary funds to enable its being pushed through to completion."

Commissioner, Central Division (Mr. G. W. Hatch, I.C.S.) :—

" The following review of the Administration reports of the Northern and Central Circle for 1925-26 (1st April 1925 to 31st March 1926) in respect of the areas in the Central Division is forwarded to the Chief Conservator of Forests with reference to Government orders, Revenue Department, No. 5542, dated 31st May 1919 and No. 1110, dated 19th April 1921.

Forest Areas

There was a net decrease of 7 square miles in the Central Circle due mainly to the grant of lands as inam to soldiers and to the giving out of lands for cultivation in exchange for lands submerged in the Andhra Valley Lake.

Demarcation

Only 3 miles of new boundary lines were demarcated during the year. Out of the 8 miles of boundary line in the Poona District referred to in last year's review, only one mile has been demarcated during the year. As usual repairs have been made to existing boundaries.

Working Plans

No new working plan was sanctioned during the year. The working plan for the Kolaba Forests which was referred to in the last year's review has not yet been submitted to Government.

The working plan for the Nawapur and Nandurbar Ranges has been approved by the Collector of West Khandesh and the Commissioner, Central Division.

Communications

New work was done in connection with the construction of 7½ miles of the Goldari-Ozar Road at a cost of Rs. 22,175 in the West Nasik Division. Rs. 7,937 were spent on the Hatgad-Wani Road in the East Nasik Division.

In the Central Circle Rs. 2,582 were spent on repairs to old roads.

Forest offences

A statement showing the number and nature of forest offences in the Central Division areas is appended. There has been a considerable increase in the total number of cases on the last year's figures as well as on the average figure of the previous three years.* The increase is reported to be due more to the effective and extensive patrolling of forests than to an increase of offences.

Protection from Fire

Protection from fire was generally satisfactory, though there has been a slight increase in the area burnt over the figures of the last year. Punitive measures were as usual enforced against such villagers as were responsible for bad protection in all the Divisions, good protection being rewarded by remission of grazing fees and by making small free grants.

The Conservator of the Central Circle is strongly in favour of communal punishment as a precautionary measure and reports that 'the stimulation of communal responsibility in the matter of fire protection was noticeable in East Khandesh.' The suggestions made by the Collector of West Khandesh in paragraph 5 (1, 2 and 3) are worth considering.

Akrani Administration

The Revenue Administration of the Akrani by the Forest Department has been on the whole satisfactory. Land assessment was collected according to the Nazar-Andazee system during the year. The Revenue Settlement of 67 villages has been undertaken.

---

*1922-23	..	.. 5,645
1923-24	..	.. 6,244
1924-25	..	.. 6,226
	3	18,125
	Average	.. 6,041

Tagai was distributed on a large scale mainly for the purchase of bullocks and seed. The progress of the Bhil boarding school is still very slow, and the need for imparting some vocational training side by side with a knowledge of the three 'Rs.' may again be emphasised. The Mission School at Mundalwad continues to make satisfactory progress.

There was a serious outbreak of sickness in the cold weather both among men and cattle. The dispensary at Dhadgaon is becoming more and more popular and the want of a suitable building for the dispensary is being keenly felt. A grant of Rs. 4,000 for this work has been sanctioned by Government in their Resolution No. 946, General Department, dated 8th October 1926. It is hoped that the grant will be fully utilized in the current year.

This is the third year since the transfer of the Excise Administration to the Forest Department. This year the consumption of liquor increased to 32,262 gallons with a revenue of Rs. 48,393 from 29,635 gallons with a revenue of Rs. 44,453 in the previous year. The increase is reported to be due to the use of liquor as a specific against a peculiar kind of sickness that prevailed in the area from December 1925 to March 1926. The number of offences detected rose from 2 in the previous year to 6 in the year under report. The increase is due partly to the Forest Staff not being busy with the Dara-Dhadgaon Road and partly to the empowering of the Police Sub-Inspector, Akrani, to investigate cases.

General Remarks

The Commissioner would emphasise the remarks made by the Collector of West Khandesh as to the necessity for a road into the Akrani. Proposals were submitted to Government in the Public Works Department in July last (this office No. P.W.D. 1/44 dated 19th July 1926). A sum of Rs. 86,000 is required to complete the first three sections of the Dhadgaon-Shahada Road; this portion should be paid for by the Forest Department, the expenditure being spread over nine years. The fourth section should be constructed by the Public Works Department.

The question of the refusal of timber merchants to pay duty on imported timber in East Khandesh is one that the Commissioner proposes to look into when he visits that District in January next."

Number of forest offences committed in Central Division during the year 1925-26

District	Injury by fire	Unauthorised felling	Grazing without permission	Other offences	Total
East Khandesh ..	63	337	413	213	1,026
North Khandesh ..	75	286	193	198	752

Total for 1924-25..	434	2,954	1,990	848	6,226

Commissioner, Southern Division (Mr. G. Monteath, I.C.S.):—

Kolaba

"1. *Forest Offences.*—The number of forest offences rose from 1076 to 1329, the increase being mainly under the heads of 'cutting' and 'grazing'. This is ascribed to the more efficient protection of the forests rather than to any persistence in crime. The area burnt also increased from 10 square miles to 11 square miles. The Commissioner considers that the nature of the dry season was responsible for it as in the forests of the Southern Circle. Communal responsibility for these fires was enforced as usual.

2. *Artificial regeneration.*—It is satisfactory that much progress was made under this head.

3. *Financial results.*—The revenue of the Kolaba Division fell by about Rs. 36,000 and there was an increase of about Rs. 5,000 in expenditure. As a consequence the percentage of surplus to gross revenue decreased from 44·4 to 32 per cent. This is due to the continued slump in the timber trade as a result of which many coupes remained unsold.

Southern Circle

"It is 10 years since I was last in this Division and in the meantime considerable changes have taken place. I have had no opportunity since my appointment here of studying forest questions. I have not been here long enough to do so, and accordingly do not feel myself qualified to do more than summarise the main points in Mr. Newman's interesting and well-written report.

2. *Exploitation of forest produce.*—In spite of continued difficulties of working due to the scarcity and high cost of labour and the paucity of good contractors owing chiefly to the depression in the timber trade, departmental extraction of timber shows some improvement; there was, however, some falling off in removals by purchasers which is ascribed to the poor quality of coupes sold and also to the fact that some coupes remained unsold in the Kanara and Belgaum Divisons. The permanent loss of a good customer in the M. & S. M. Railway for fuel has been so far only partly made good by local purchasers whose operations however show considerable increase in the quantity extracted over that of the previous year. The prices for timber realized at Depots do not show any marked improvement. All these causes combined resulted in large arrears in the prescriptions of Working Plans though not to the same extent as in previous years.

3. *Improvement of communications.*—It is satisfactory that a larger amount was made available for expenditure under this head in spite of the fall in the revenue.

4. *Forest offences.*—There was a decrease in the total number of offences all round except in the Belgaum Division where, as the Collector

says, the sudden increase requires investigation. Possibly stricter punitive measures are required. The decrease in fire and cutting offences in the Kanara Northern Division which is the great teak yielding area of the Circle and where a large number of offences were reported during the previous year, is satisfactory. Still the number of grazing and other offences in the Division is large. The increase in fire offences in all Divisions except Kanara, Northern Division and Eastern Division is doubtless largely due to the dry nature of the season. In the Belgaum Division, both the Collector and the Conservator ascribe the increase to intentional firing out of malice towards forest contractors. I imagine that more fires are intentional than accidental, and I would remark that the actual number of fires that may occur is not an accurate indication of the number of offences under this head, nor again is it an indication of the degree of opposition of the people to forest protection, for one man with a supposed grievance may start half a dozen fires in different places. That has happened repeatedly. Further the detection of fire offences is extremely difficult, and the number of offences is no criterion of damage done. One single offence may result in the burning of twice as large an area as ten others combined. All this is obvious, and it is equally so that comments on the variations from year to year in the number of fires, the number of supposed fire offences and the area burnt is not of much use. It is rather a wonder, considering the reductions in establishment, that offences of all kinds have not greatly increased. Failing detection of offenders, which as I have said is extremely difficult, judicious communal punishment, and on the other hand communal reward, are the best expedients, and I think the results show this to be so. Of the decrease in the grazing offences, the largest occurred in the Dharwar-Bijapur Division which is chiefly due to the steps taken at the suggestion made by the Commissioner last year.

5. *Fire protection.*—The Mangutti firing case noted under this head last year was suitably dealt with under the Commissioner's orders.

6. *Cattle impoundings.*—There was a fall of about 34 per cent. in the number of impoundings in the Dharwar-Bijapur Division which may be due to the measures adopted at the Commissioner's suggestion to throw open a larger area to cattle grazing in the Dharwar District. Proposals to release more ground for sheep and goat grazing in the Bijapur District, to the inadequacy of which the Collector refers in his remarks, are under the Divisional Forest Officer's investigation. Adequate provision of grazing grounds in this way is likely to maintain the present attitude of the people which is described by the Conservator as follows:—

'As a rule there is no tendency towards intentional grazing in closed areas and in most cases trespass was accidental.'

7. *Removal of lantana, prickly pear and other pests.*—No special work was undertaken owing to its prohibitive cost. It is impossible to provide for expenditure of such a nature so long as the high cost of labour continues and the state of the timber market does not materially improve.

8. *Sylviculture.*—The rainy season was not favourable to the younger seedlings which died in a number of places owing to long breaks, but it was definitely favourable to the older plantations which thrived very well. The details given under this head in the report show the large extent of the systematic operations carried on for the propagation of tree growth, especially of teak and other valuable species. Operations were carried on in the casuarina plantations in charge of the Revenue Department on the seacoast of Ratnagiri according to the fixed programme but a very large number of seedlings planted during the year died owing apparently to some defect in planting. Instructions have been issued to the Mahalkari in charge of the operations and it is hoped that the plantation will show better results next year.

9. *Saw mills.*—The outturn of the saw mills increased and all the mills for the first time showed profits which amounted to Rs. 1,45,628. The Conservator is sure that the improvement in the mill at Dandeli may be depended on to continue and that it is capable of further development.

10. *Financial results.*—The gross revenue fell by about 3 lakhs and though there was a decrease of only a lakh in expenditure the percentage of surplus came down from 40·1 to 36·9. This fall was mainly due to the stoppage of the M. & S. M. Railway fuel contract and is likely to continue as there is little or no prospect of securing a market for all the fuel which the forests are capable of yielding. The loss would have told more severely on the finances had it not been for the incessant efforts of the department to increase revenue in other directions, for which much credit is due to the Conservator and the officers under him. The loss incurred during the year on account of coupes sold and of combination among contractors is of a temporary kind and should disappear in future. Still as the Conservator says, there is not at present much ground for optimism about the future. Efforts will not be wanting on the part of the Department to keep up the revenue.

11. *Kumri cultivation.*—A report on the Belgaum Kumri (referred to by the Divisional Forest Officer, Belgaum) was submitted to Government under this office No. F. O. R.—172, dated 16th January 1926 and their orders are awaited.

12. *Land Revenue administration of Forest Mahals.*—The 5 Mahals in Kanara continued to be administered by the Forest Department and the Conservator testifies to the good relations between the Department and the inhabitants. I do not know how long ago the Supa Mahal was discontinued, nor why it was discontinued but I suppose because it was considered that it gave the Divisional Forest Officer too much to do. I think myself he could have managed it without difficulty and with a good deal of advantage.

13. *Kanara forest matters.*—(1) The Alnawar-Dandeli Railway was worked at a greater loss during the year than previously and unless the railway authorities make suitable arrangements for wagons the loss is likely to continue.

(2) The Government Cart Depot at Kirwatti showed a small surplus for the first time in recent years.

(3) The logging operations in the very difficult Nagzari valley by means of a tractor and an animal winch have been successful. The Foden tractor used on the Kirwatti-Hubli road for the transport of sleepers did not work so well but it had the desirable effect of very quickly bringing down cart hire to normal.

(4) The remarks of the Kanara Collector show that the Coast Division is being worked harmoniously under his control.

(5) The village panchayats established for the management of the minor forest in some of the villages of the Coast Division continued to function but the Collector considers it too early to express any opinion as to their utility.

I agree with the Collector's unwillingness to sanction the establishment of more Panchayats until those already constituted are shown to be successful.

14. *General.*—The year was a very strenuous one for the Department who have, however, continued to maintain a very high standard of efficiency in administration and the results obtained show uncommon energy and devotion to duty on the part of Mr. Newman and his officers. The Forest Department and the Revenue Department have continued to work in close co-operation throughout."

	Ankola Coast Working Plan.	1911	3,087	2,674	Some coupes are too poor and are not sold.
	Arbail Slopes ...	1918	3,741	1,873	For want of contractors.
	Honáwar Tali Palm ...	1909	13,934	14,306	Excess due to deficiency in the number of trees and the necessity to meet the requirements of privilege holders and others.
	Kasarkod Haldipur Casuarina Plan (Revised).	1922	118	118	
	Soppinhosalli High Forest.	1913	7,832	6,342	Due to labour difficulty.
	Ankola Kumta Coast ..	1911	3,789	1,816	Due to nature of crop with no valuable timber.
Do. S. D. ...	Yekambi-Sonda High Forest.	1915	15,886	10,118	Held in abeyance under Government orders owing to transport difficulties.
	Sirsi Town Fuel Plan revised.	1924	...	...	The plan has been cancelled in G. R., R. D., No. 2571 of 17th February 1926.
	Chandawar Fuel Plan...	1915	...	...	The whole of this plan except an area of 791 acres belongs to Kanara Coast Division and this has not become due for working.

FORM NO. 55-A—*contd.*

Division	Name of Working Plan	Year in which sanctioned	Area up to date		Brief statement of reasons for arrears
			To be worked	Actually worked	
1	2	3	4	5	6
SOUTHERN CIRCLE—*contd.*			Acres	Acres	
Kanara, W. D. ...	Revised Gund Working Plan.	1925	809·8	10,533 (1)	(1) Includes area worked according to the previous plan, the area worked in 1925-26 according to Revised Plan is 303 acres.
	Kalinadi Slopes Working Plan.	1911	10,357·1	11,086	Fellings were carried out in some compartments not due for supply of G. I. P. Indent; hence the excess.
	Supa Fuel Working Plan.	1906	Not prescribed.	8,202	Many of the coupes had no bidders.
	Kárwár Fuel Working Plan.	1903	21,924	16,607	Blocks XIII and XIV are left off for privileges. No bids for many of the coupes.
	Karwár Casuarina Plantation Plan.	1911	129·7	246	Excess due to irregular fellings for war supply in 1918 and felling areas according to Revised Working Plan.
	Kadra, Mardi and Sulgeri Teak Plantation Plan.	1910	713	713	
Do. Coast Division.	Ankola-Kumta Coast Working Plan.	1911	2,933	1,101	Many coupes could not be sold in previous years for want of demand and many coupes lie in groups where there are no Coast Depôts
	Chandawar Fuel Plan...	1915	2,386	1,706	Size of the coupes being large extensions had to be given for working them in previous years. Since 1924-25 prescriptions of the plan were not followed as it was to be revised.
	Honavar Tali Palm ...	1909	1,353	1,353	The whole area is taken into minor forest.
Belgaum	Golihalli-Godoli Teak Pole Working Plan.	1900	5,268	5,268	
	Khánápur Fuel Reserves.	1903	51,506	44,223	Difficulty in procuring labour and transport and fall in the fuel market.
	Varkhad-Hemadge Fuel Reserves.	1906	2,093	2,046	
	Gokák Fuel Plan ...	1916	46,620	45,108	Due to coupes remaining unsold.
	Nagargali High Forest.	1915	3,400	2,885	Labour difficulty and unsatisfactory work by contractors.
Dhárwár-Bijápur .	Bankapur Hangal Forests Blocks XI to XVI.	1917-18	2,758	2,722	One coupe not sold.
	Dharwar Working Plan (Blocks I to VIII).	1909	15,899·5	15,894·5	Difference found out in laying out coupes.
	Kalghatgi Working Plan (Blocks I to XIII).	1917	8,786·5	8,768	Area not fully worked out, one advance coupe is being worked from each of Blocks X to XIII.
	Bijápur Scrub Forests Working Plan; Blocks I to VIII.	1926	23,553	12,984	Sanctioned in G. R., R. D., N°. 5735 of 19th February 1926. Coupes worked in advance according to prescriptions of the Plan. Full number of coupes were not sold; hence deficit.

FORM NO. 55-A—*concld.*

Division	Name of Working Plan	Year in which sanctioned	Area up to date		Brief statement of reasons for arrear
			To be worked	Actually worked	
1	2	3	4	5	6
SIND CIRCLE			Acres	Acres	
Sukkur ...	Revised Working Plan.	19/3-24	35,652	34,609	The difference is due to non-sale of coupes for 1922-23 of Pano Akil Range.
Shikárpur ...	Do. ...	...	23,780	22,142	Due to actual measurement on the ground and non-disposal of certain coupes of 1922-23, 1924-25 and 1925-26.
Larkana ...	Do. ...	...	21,265	19,512	Due to actual measurements on the ground and partly to non-exploitation of coupes by the contractors and non disposal of certain coupes.
Hyderábad ...	Do. ...	1916-17	31,669	30,314	Due partly to non-exploitation of coupes by contractors and partly to reservation of coupes containing Lac.
Karáchi ...	Do. ...	1916-17	38,891	36,773	Due to area of blanks having been kept apart for reboisement—also due to erosion and actual measurements on the ground.

Report.

Forest Department.

Administration — of, in the Bombay Presidency, including Sind, for the year 1925-26.

GOVERNMENT OF BOMBAY.

REVENUE DEPARTMENT.

Resolution No. P.—57.

Bombay Castle, 5th May 1927.

Letter from the Chief Conservator of Forests, Bombay Presidency, No. 2642 dated 14th October 1926—Submitting the Forest Administration Report of the Bombay Presidency, including Sind, for the year 1925-26.

RESOLUTION.—The total revenue of the Forest Department for the year 1925-26 amounted to Rs. 75·26 lakhs and the expenditure to Rs. 41·97 lakhs as against Rs. 73·77 and Rs. 41·34 lakhs respectively for the previous year. The surplus of Rs. 33·29 lakhs represents 44·2 per cent. of the gross revenue as against 44 per cent. for the previous year. This increase though very slight is satisfactory in view of the conditions of trade prevailing, for the figures for 1924-25 showed a marked increase over those of 1923-24 and of the preceding quinquennium. The increase occurs in the Northern Circle and in Sind. Government are glad to note that the Chief Conservator forecasts a general increase in all the Circles during the current year. The slight increase in expenditure is due to a large outlay on works and saw-mill stores in the Northern and Southern Circles.

2. The work of the saw-mills continues to expand. Owing to the removal of the one at Tambepur, only six worked during the year under review as opposed to seven in the preceding year, but the accounts show a net profit of Rs. 1,83,543 as against Rs. 1,62,057. The only mill which showed a loss was that at Karanjara in the Dangs, which, as was noted last year, is old, and will soon be scrapped.

3. The value of major and minor produce removed by purchasers was Rs. 34,10,156 and Rs. 12,07,838 respectively as against Rs. 33,05,838 and Rs. 12,68,762 during the preceding year. Major and minor produce removed by concessionists and free grantees amounted to Rs. 10,25,465 as against Rs. 8,58,363. The grazing fees show a slight falling off, the figures being Rs. 5,11,056 as compared with Rs. 5,64,175 last year. The value at the full rates amounted to Rs. 21,04,068 and Rs. 21,75,018 respectively.

4. Government regret that owing to the financial stringency it has not been possible to allot larger funds for the construction of communications, which they realise are of the utmost importance. The inelasticity of the financial rules complained of by officers in charge of works has to some extent been removed by the orders that amounts which will be made available in the coming financial year are to be communicated at the beginning of March instead of in April.

5. Government note with satisfaction the progress made in the use of mechanical methods of extraction and transport. They regard this as a matter of the greatest importance, as it will open up areas which it has not hitherto been possible to exploit, and may obviate considerable expenditure upon extraction roads. They will also watch with interest the results of the research branch which has been inaugurated and the experiments which are being made in the plantation of trees suitable for matchwood.

6. The report of the Forest Grievances Committee has been received. Orders have already been passed on the subject of communal punishments. Orders on the remainder of the report will be issued at an early date.

7. The thanks of Government are due to the Chief Conservator and the officers serving under him for their successful working of the department during the year under report.

By order of the Government of Bombay
(Transferred Departments),

H. F. BALL,
Deputy Secretary to Government.

G. R. No. P.—57, R. D., dated the 5th May 1927.
